Garden Grove, CA 92841

SUBJECT: City of Stanton Request for Coordination Regarding Community Recovery Efforts

GKN Aerospace Leadership Team:

I am reaching out on behalf of the City of Stanton regarding the ongoing recovery efforts associated with the recent incident at your Garden Grove facility.

Although the incident occurred outside Stanton's jurisdiction, our community experienced significant impacts, including mandatory evacuations of the majority of our city, disruption to residents and businesses, and the deployment of substantial public safety and city resources.

As recovery efforts continue, the City of Stanton believes it is important to establish direct communication and coordination with GKN so that we may better understand your plans moving forward, share information regarding community needs, and identify opportunities to support impacted residents and businesses. It is also important that Stanton residents and the business community receive clear, timely, and accurate information regarding GKN's plans for environmental assessment, remediation and mitigation activities if needed, ongoing monitoring, and broader community recovery efforts.

We request that a representative from GKN contact our City Manager Hannah Shin-Heydorn (hshinheydorn@stantonca.gov; 714-890-4277) to discuss next steps and establish an ongoing line of communication.

We appreciate the collaboration demonstrated among regional response partners throughout this incident and look forward to working together as our communities continue through the recovery process.

Sincerely,

David J. Shawver
Mayor
City of Stanton
